ENTERED AT SAN FRANCISCO, CAL. AS SECOND-CLASS MATTER

JUST READY—ADOPTED BY U. S. GOVERNMENT AS "THE LAW"

## Hornsby & Schmidt's Modern Hospital

"Hornsby and Schmidt" tells you just exactly how to plan, construct, equip, and manage a hospital in all its departments, giving you every detail. It gives you exact data regarding heating, ventilating, plumbing, refrigerating, etc.—*and the costs*. It tells you how to equip a modern hospital with modern appliances. It tells you what you need in the operating room, the wards, the private rooms, the dining room, the kitchen—every division of hospital housekeeping. It gives you the duties of the directors, the superintendent, the various staffs, and their relations to each other. It tells you all about nurses' training schools—their management, curriculum, rules, regulations, etc. It has a section on pathology. It has a section on hydrotherapy. It has a section on the hospital pharmacy. It gives you definite diets for the patients and the hospital household. It gives you hundreds of valuable points on the *business management* of hospitals—large and small. In fact, it is a book every medical man—particularly those especially connected with hospitals—should own. It tells you how to plan, construct, equip, and maintain a hospital with the greatest economy compatible with the highest efficiency—and it tells you as no other book does.

"Every element in the construction, equipment, and administration of a modern hospital is considered and sensibly discussed with a strong and attractive spirit of personality. The illustrations are many and well chosen. The book is a valuable contribution to the literature of hospital administration."—*Boston Medical and Surgical Journal*.

Large octavo of 644 pages, with 207 illustrations. By JOHN A. HORNSBY, M.D., Secretary, Hospital Section, American Medical Association; and RICHARD E. SCHMIDT, Architect. Cloth, \$7.00 net; Half Morocco, \$8.50 net.
